

CONFIDENTIAL PROPOSAL

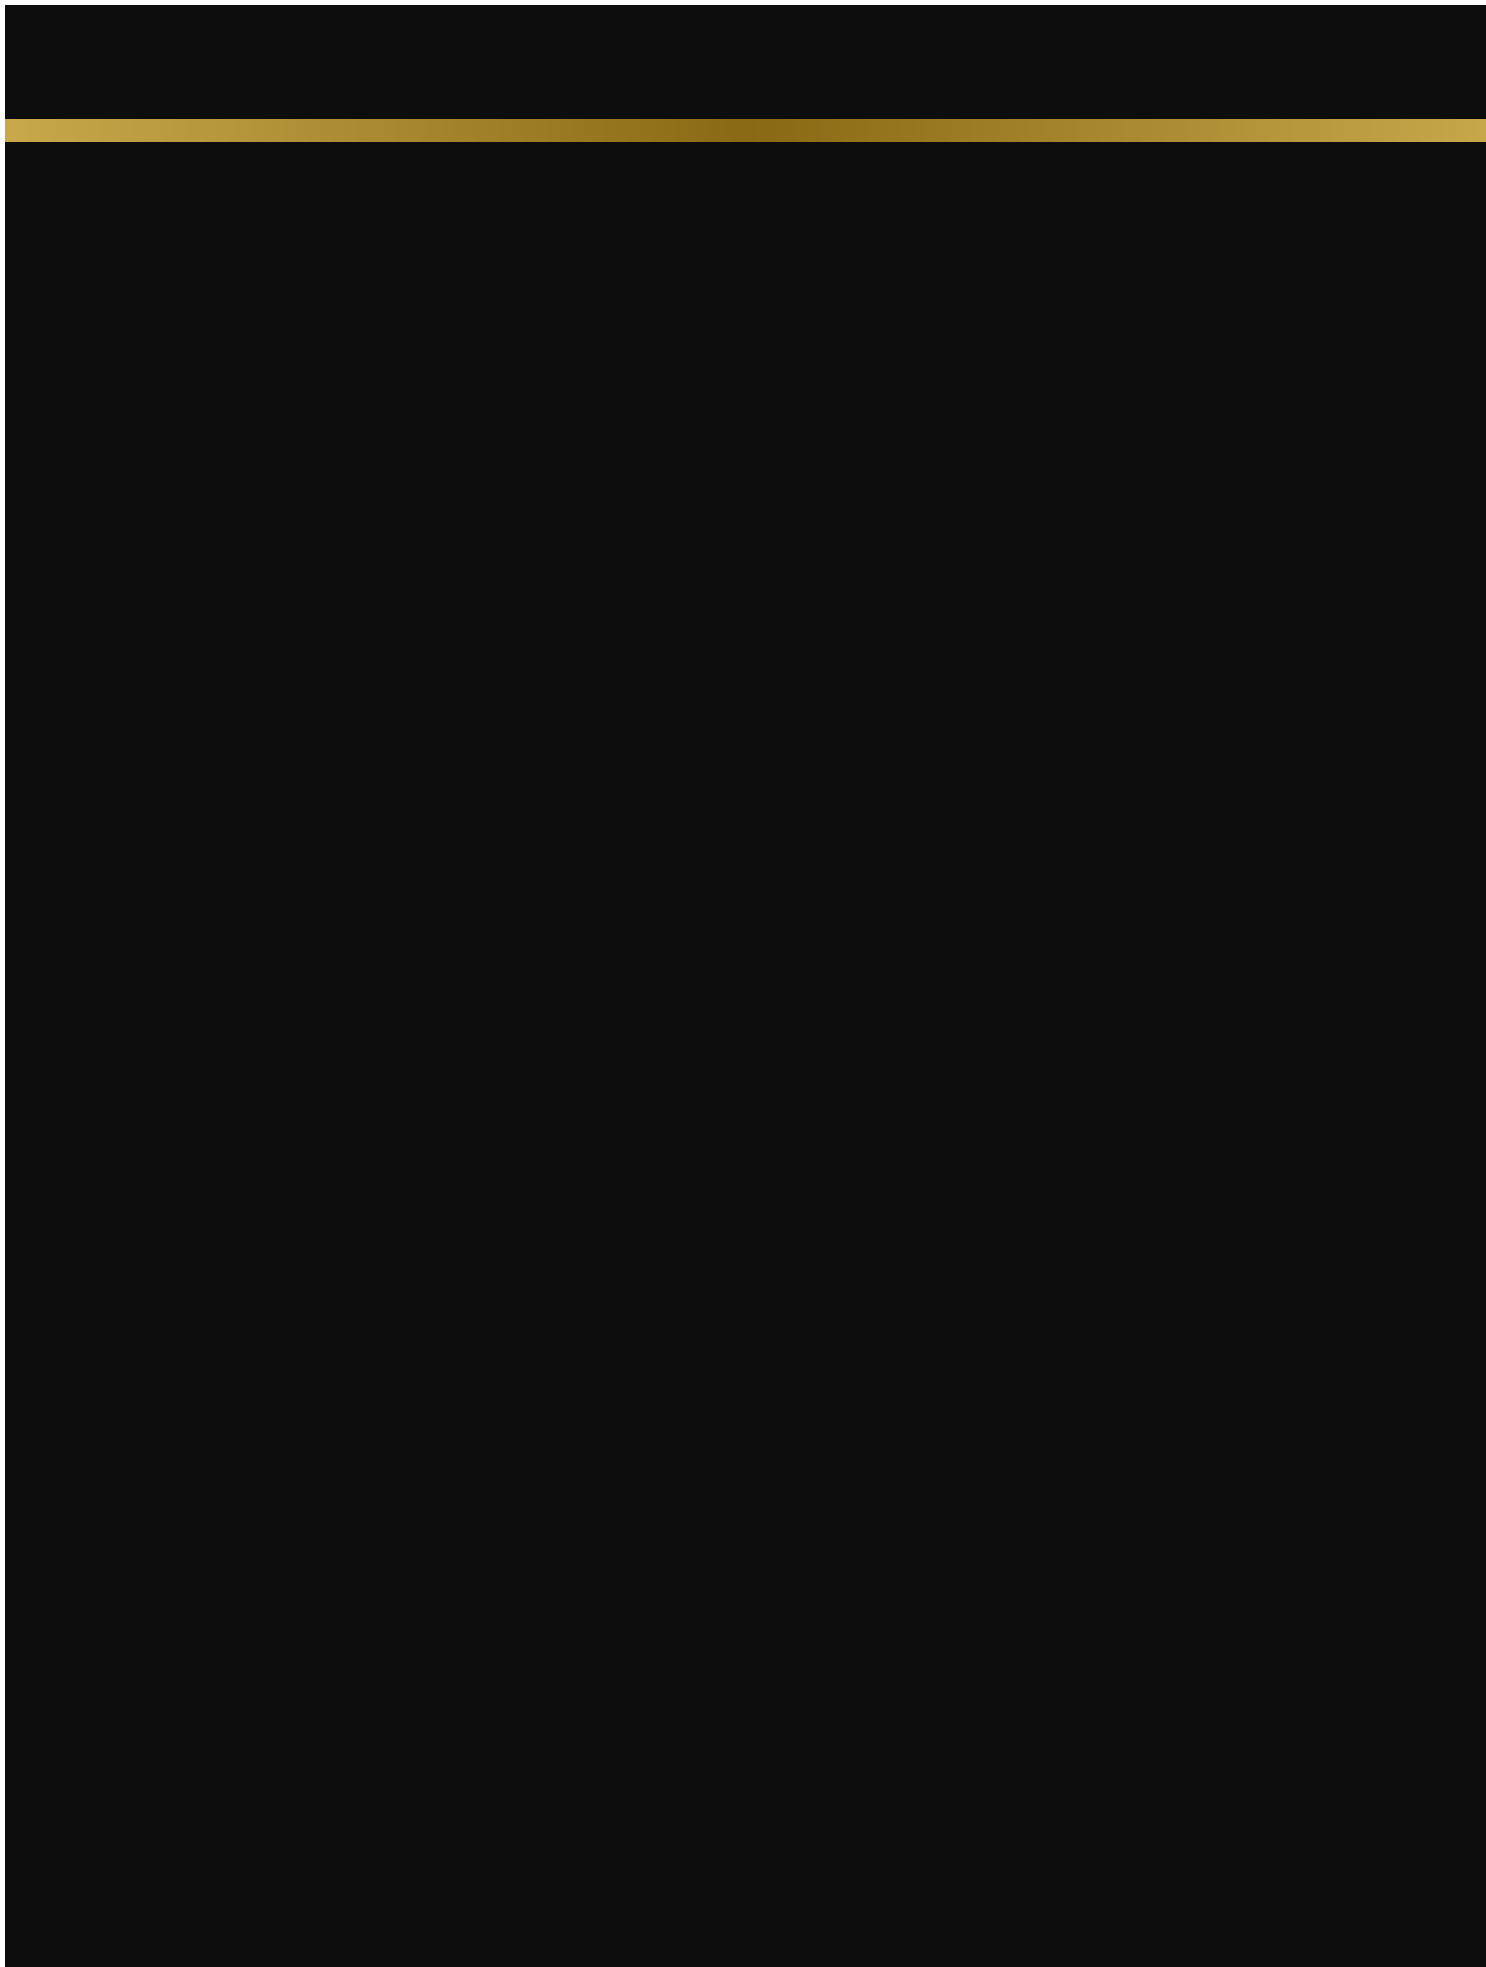

A Business System Built for *Excellence*

How to run two luxury businesses — seamlessly, from one
place, without the noise.

Prepared for Akheel Khan

MANNZILO · THE FITTING ROOM ON EDWARD

MARCH 2026

THE REALITY

Running two luxury businesses is *complex*

You've built two exceptional brands. But behind every beautiful garment and every exquisite piece, there's an operational world that demands just as much attention — and most tools weren't built for someone doing what you do.

**CLIENT MEASUREMENTS**

Stored across notebooks, apps, or memory. Hard to find, easy to lose, impossible to scale.

**FOLLOW-UPS**

Suits ready, alterations done, new arrivals — reminders that fall through the cracks cost repeat business.

**HIGH-VALUE CLIENT MEMORY**

A client's preferences, past purchases, budget — all the context that makes luxury feel personal.

**ORDER TRACKING**

From consultation to fitting to handover — knowing where every order stands without chasing your team.

"The luxury experience your clients feel should match the system behind it."

THE SOLUTION

One *unified* system. Both businesses.

A bespoke operations platform built specifically for Mannzilo and The Fitting Room — not a generic CRM you have to wrestle into shape. A system that speaks your language and runs the way you work.

- **Client Intelligence Hub**
Every client in one place — measurements, preferences, purchase history, notes, last contact. Know everything before they walk through the door.
- **Order Lifecycle Management**
From first consultation to final handover. Track every garment and every piece through every stage — fabric selected, in tailoring, ready, delivered.
- **Automated Follow-Ups**
Set it once. The system handles the rest — order ready notifications, 6-month re-engagement, birthday messages, event prompts. All in your voice.
- **Proposal & Quote Generator**
Beautiful, branded proposals in under 2 minutes. Suit specs, fabric swatches descriptions, pricing — ready to send while the client is still in your showroom.
- **Appointment Intelligence**
Know who's coming, why they're coming, and what they bought last time — before you say hello.

MANNZILO — BESPOKE TAILORING

Built around the *bespoke* process

Every Mannzilo suit begins with a conversation and a measurement. The system is built to match that process — capturing what matters, so nothing is left to memory.

FEATURE	WHAT IT DOES FOR YOU
Measurement Profiles	Full client measurements stored permanently — updated at each fitting, accessible instantly
Fabric & Style Preferences	Record what each client gravitates toward — colour, weight, occasion — and surface it on their next visit
Order Stages	Consultation → Fabric selected → In tailoring → First fitting → Alterations → Ready for pickup → Delivered
Event Calendar	Track upcoming weddings, races, galas — prompt the right clients at the right time
Alteration History	Every alteration logged per garment — no more repeating the same conversation
Bridal & Group Orders	Manage full wedding parties, groomsmen fittings, and group timelines in one view

*"Your clients pay for a seven star experience.
Now your operations can match it."*

THE FITTING ROOM ON EDWARD — FINE JEWELLERY

High-value clients deserve *perfect* recall

In fine jewellery, the relationship is everything. The system ensures every interaction is informed, personal, and perfectly timed.

Client Purchase History

Every piece a client has purchased — style, metal, stone, occasion, value — available in seconds. Know their taste before they ask.

Certificate & Documentation

Attach GIA and IGI certificates, valuations, and provenance documents directly to each sale and client record. Always findable.

Inventory Intelligence

Know what you have, what's on consignment, and what's moved — without a spreadsheet. Filter by metal, stone, price, or availability.

Anniversary & Occasion Triggers

Automatically prompt follow-up for engagements, anniversaries, and milestones. Be the person who remembered when no one else did.

Commission & Custom Orders

Track bespoke commissions from design brief through to delivery — with client sign-off recorded at each stage.

Both businesses share the same client base. The system connects them — one client profile, both purchase histories, one relationship.

HOW IT WORKS

Simple to use. *Private* by design.

The system runs on your own machine or a private server — your client data never touches a public cloud. No subscriptions to a platform that owns your data. No third party with access to your clients.

- 1. Discovery Session**
We map your current workflow across both businesses — how clients come in, how orders are tracked, where time is lost.
- 2. Custom Build**
The system is built specifically for Mannzilo and The Fitting Room — your terminology, your stages, your process.
- 3. Data Migration**
Existing client records, measurements, and order history are imported. Nothing starts from zero.
- 4. Training & Handover**
You and your team are set up and comfortable before we consider it done. Ongoing support included.
- 5. Continuous Improvement**
As your businesses evolve, the system evolves with them. New features added as you need them.

 Data stays on your machine

 No third-party access

 Works offline

 Fully custom-built

 Accessible on any device

THE NEXT STEP

Akheel,

THIS IS BUILT AROUND YOU

You've built two brands on the belief that excellence is in the details. This system is built on the same belief — every feature exists because someone who runs a business like yours needed it.

The next step is a 30-minute conversation. No commitment, no pitch — just a look at where your time is going and what a system built around you would look like.
