

CONFIDENTIAL PROPOSAL · MARCH 2026

Mannzilo
The Fitting Room

A BESPOKE BUSINESS SYSTEM

Operate with the same *precision* you create with.

A purpose-built operations platform for two
luxury businesses — designed around the way
Akheel Khan works.

PREPARED FOR

Akheel Khan

The gap between craft and *operations*

You deliver a seven-star experience to every client. But behind it, the systems holding it together weren't built for someone running two luxury businesses at this level.

CLIENT MEASUREMENTS

Notebooks, apps, or memory. Fragmented across visits. One source of truth doesn't exist.

ORDER TRACKING

Knowing where every garment and every piece stands — without physically chasing your team — is harder than it should be.

FOLLOW-UPS THAT DON'T HAPPEN

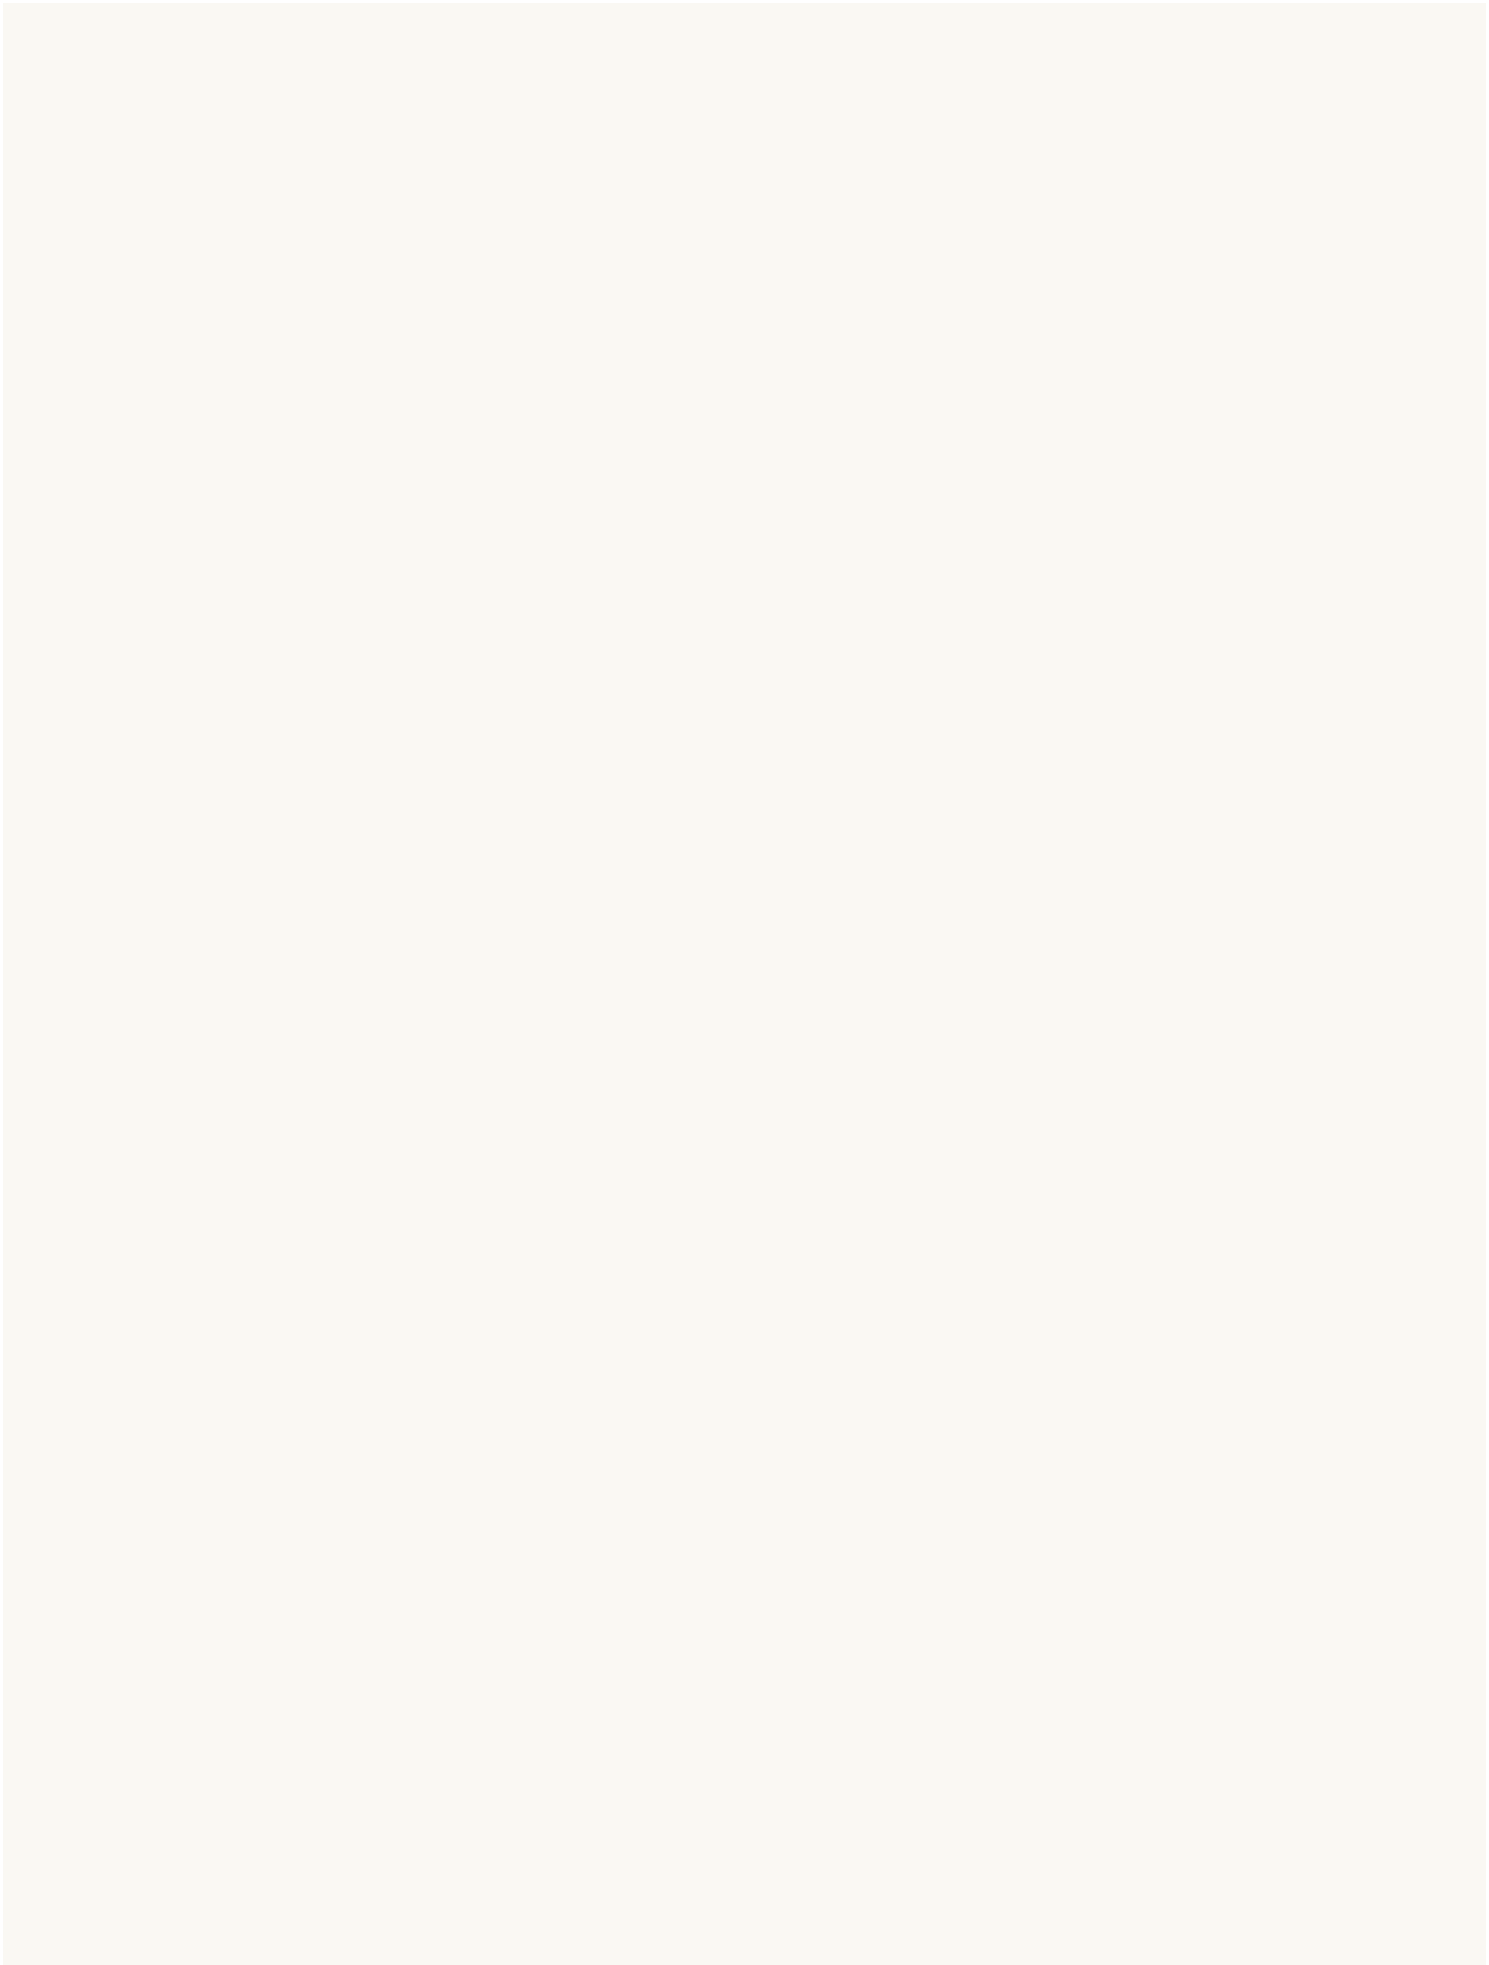

Order ready. Alteration done. New piece arrived. Reminders that slip cost you repeat business from clients who were ready to buy.

CLIENT INTELLIGENCE

Their preferences, past purchases, budget range, upcoming events — context that should be instant isn't captured anywhere central.

“

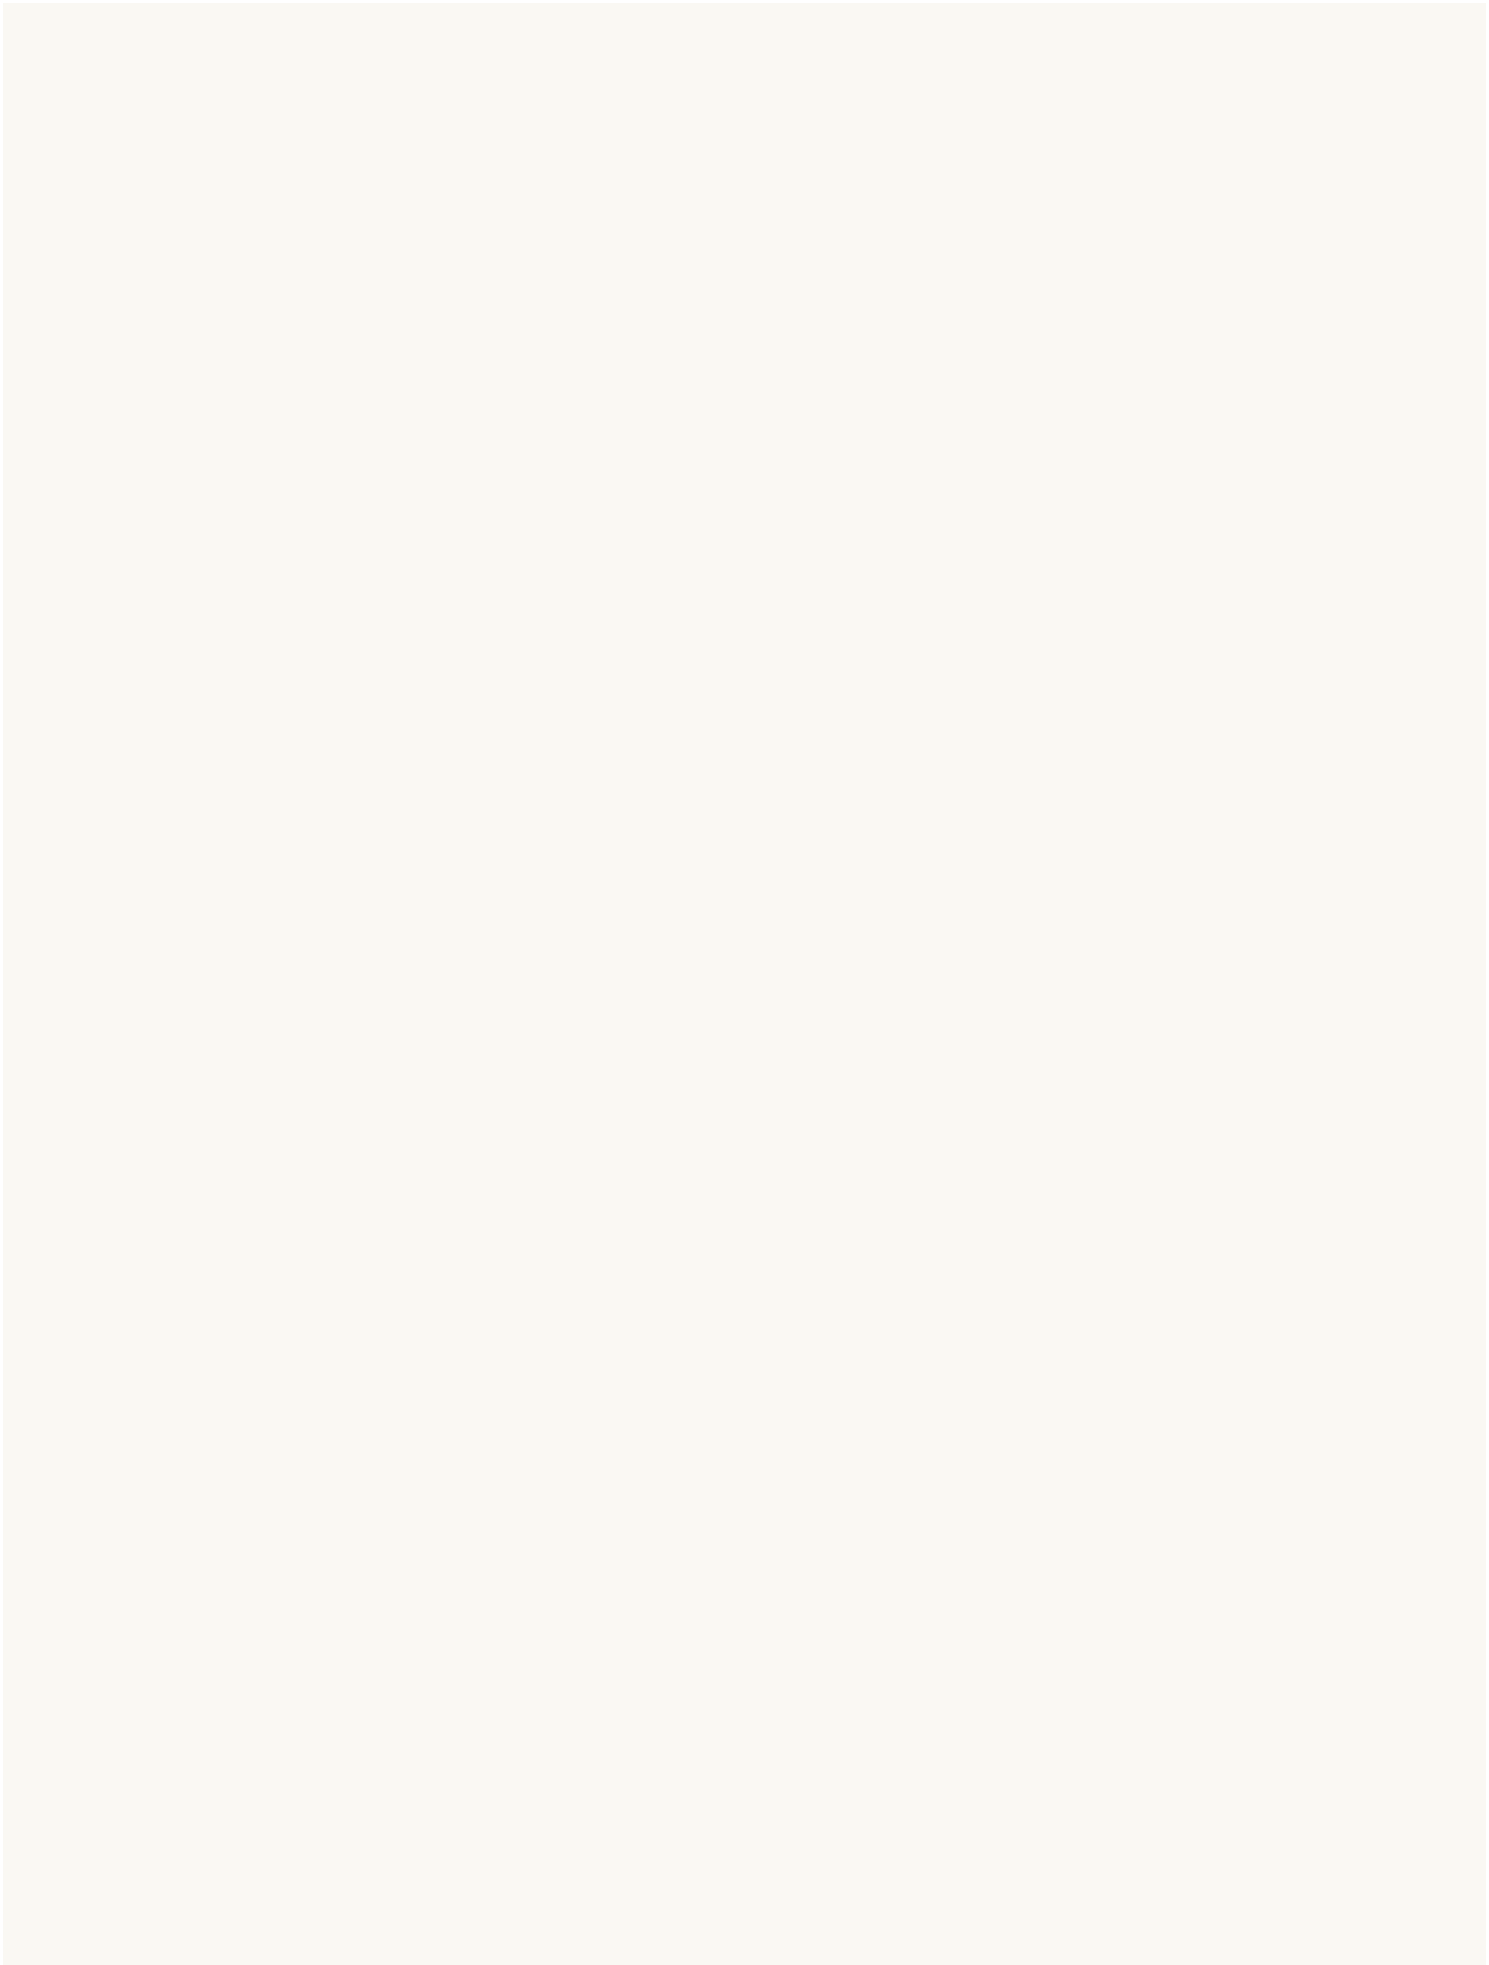

The experience you create in the room deserves a system that matches it behind the scenes.

One system. *Both* businesses.

A custom operations platform built around how Mannzilo and The Fitting Room actually work — not a generic CRM you have to bend into shape. Every feature exists because a luxury business needed it.

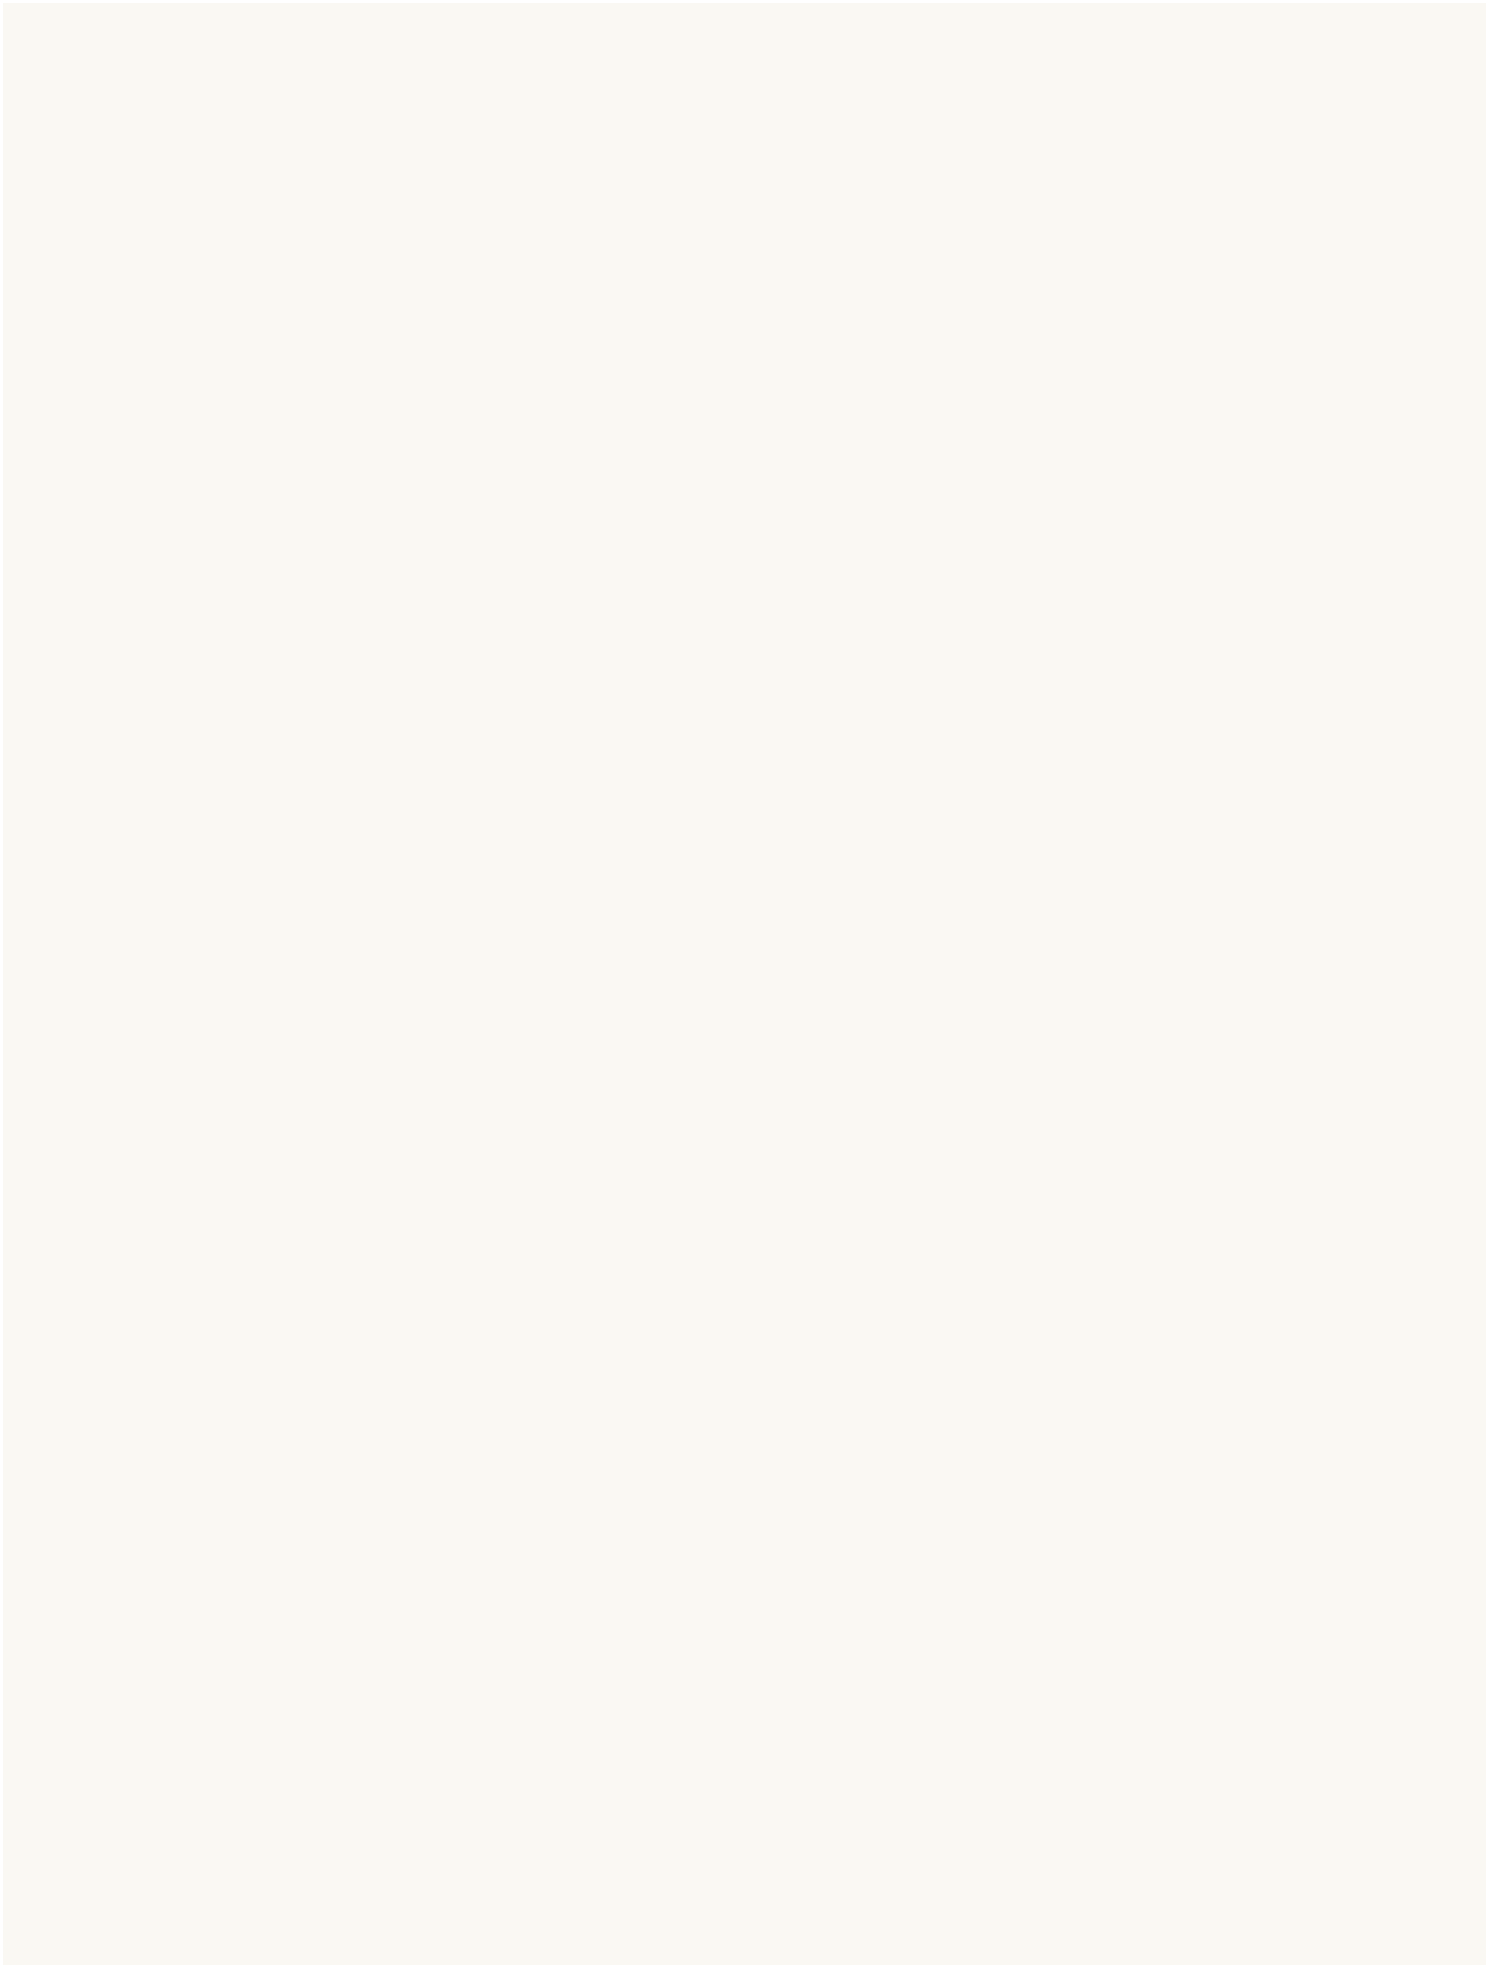

- 1 Client Intelligence Hub**
Every client — measurements, preferences, history, notes, last contact — in one place. Know everything before they arrive.
- 2 Order Lifecycle Management**
Consultation → fabric selected → tailoring → first fitting → alterations → ready → delivered. Every stage tracked, nothing forgotten.
- 3 Automated Follow-Ups**
Set once, run always. Order ready, 6-month re-engagement, birthdays, event prompts — all in your voice, on your schedule.
- 4 Proposal Generator**
Branded proposals in under 2 minutes. Suit specs, fabric descriptions, pricing — ready to send while the client is still in the showroom.
- 5 Appointment Intelligence**
Who's coming, why they're coming, what they last purchased. Relevant context, automatically surfaced before each appointment.

Built around the *bespoke* process

Every Mannzilo suit begins with a conversation and a measurement. The platform is designed to support that exact process — capturing what matters, surfacing it when needed.

FEATURE	WHAT IT DOES FOR MANNZILO
Measurement Profiles	Full client measurements stored and updated at each fitting — accessible instantly, never lost
Fabric & Style Preferences	Record colour, weight, and occasion preferences per client — surfaced on their next visit
Order Stages	Every garment tracked from first consultation through to delivery, with team notes at each stage
Event Calendar	Upcoming weddings, races, galas — the system prompts the right clients at the right time
Alteration History	Every alteration logged per garment — no repeating the same conversation across visits
Group & Bridal Orders	Manage full wedding parties, group fittings, and coordinated timelines in one view

High-value clients.

Perfect recall.

In fine jewellery, the relationship is the product. The system ensures every conversation is informed, every piece is traceable, and no client moment is left to memory.

Client Side

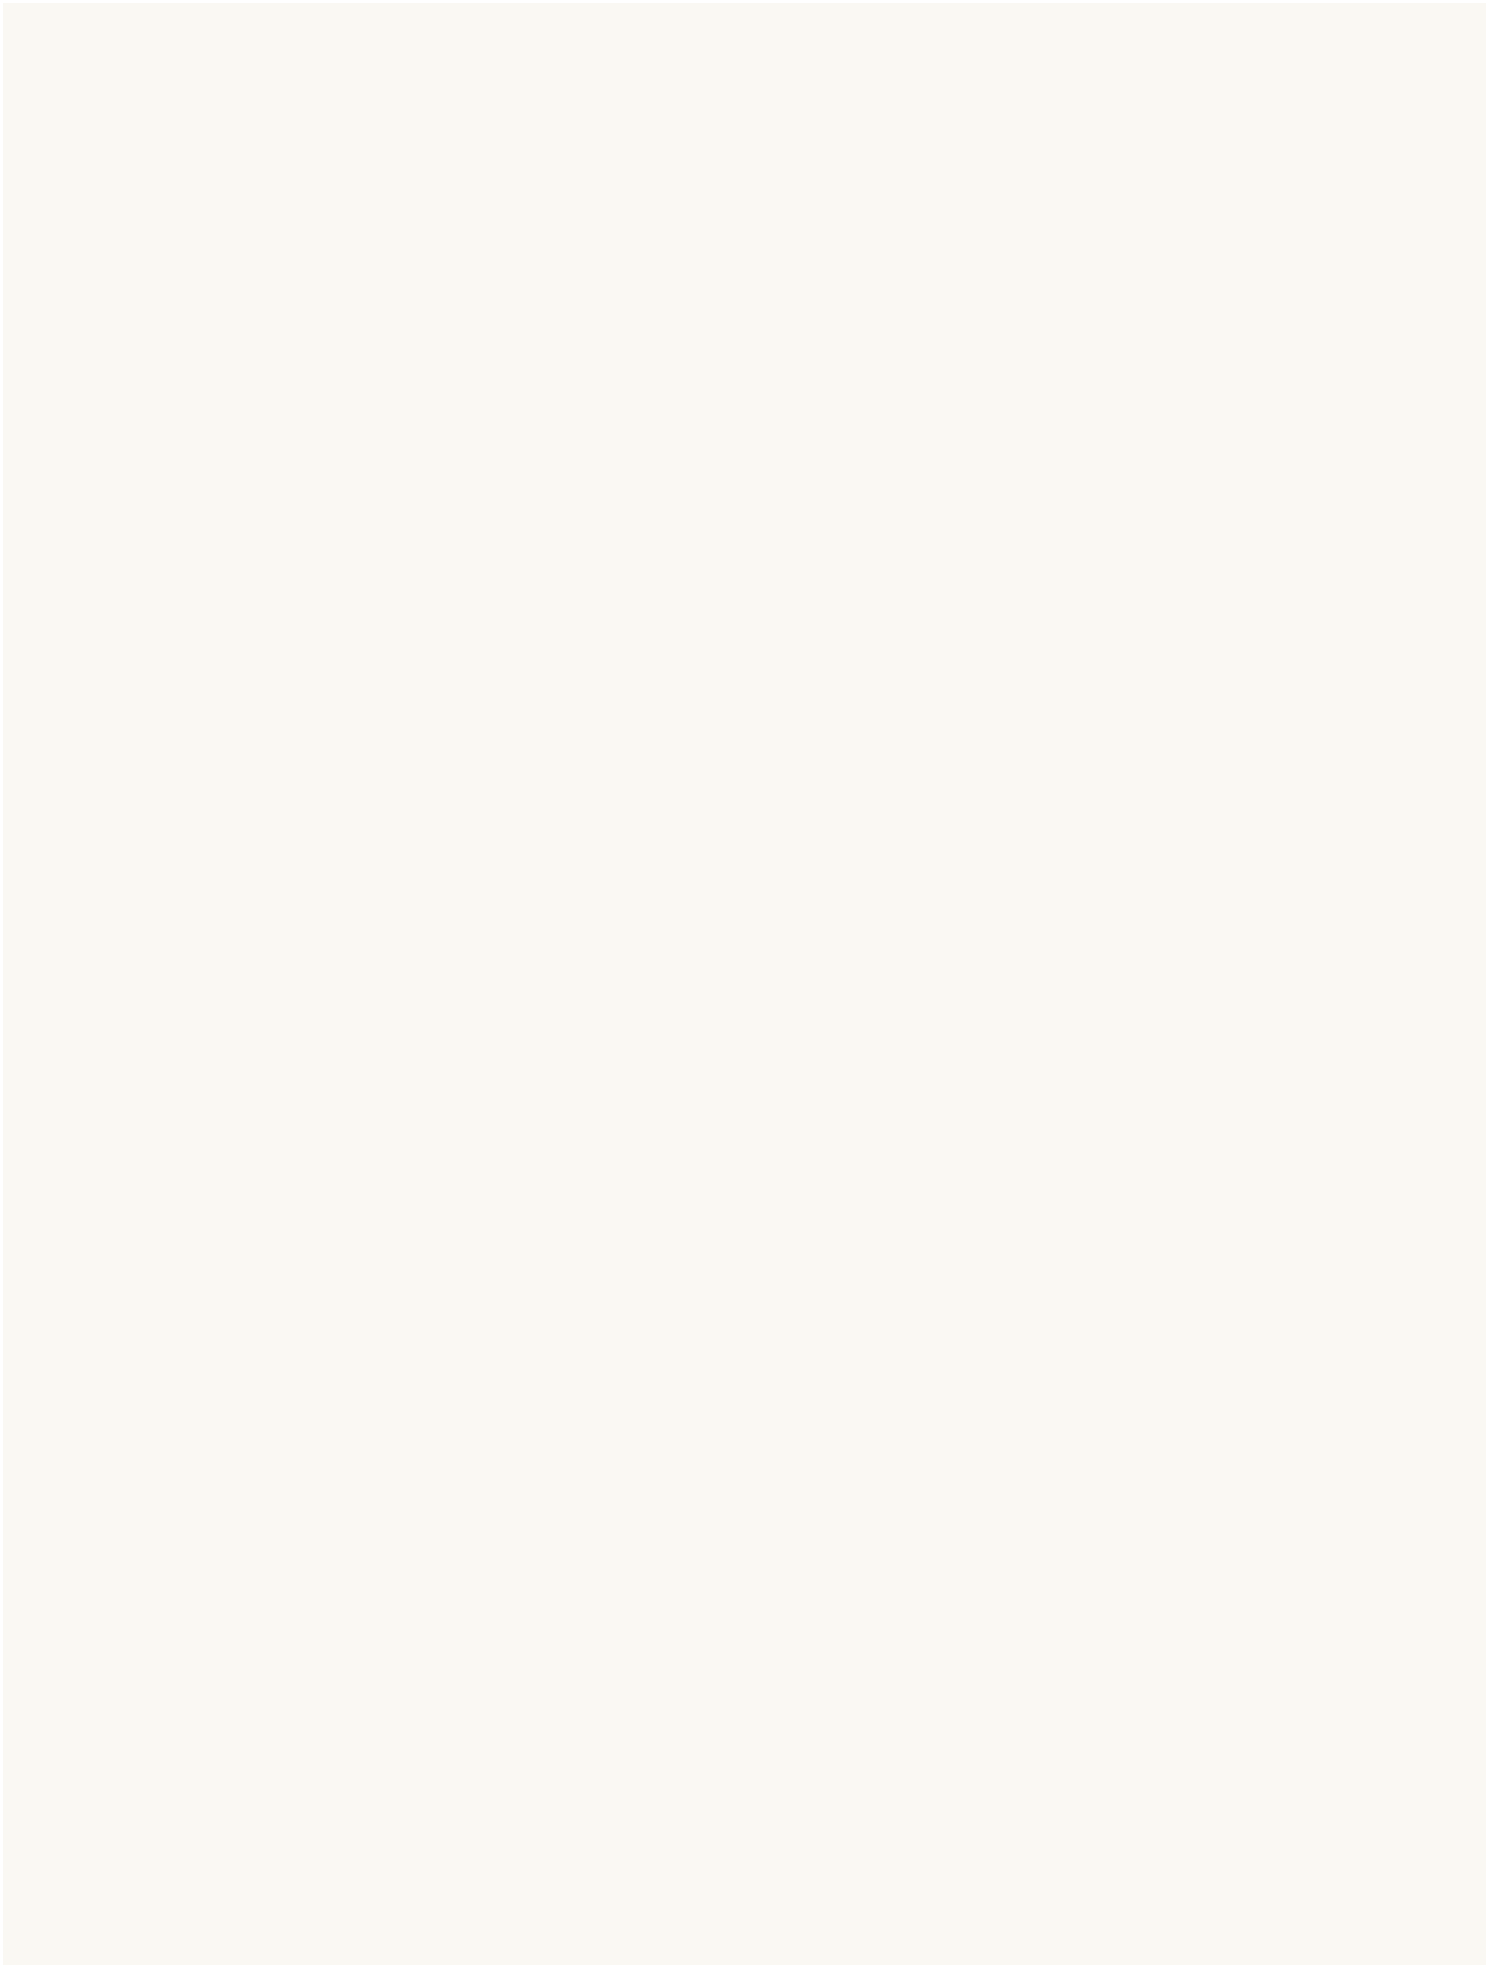

- Purchase history — every piece bought, with style, metal, stone, occasion, and value
- Anniversary triggers — engagements, birthdays, milestones prompted automatically
- Taste profile — preferences logged across every visit
- Commission tracking — bespoke order stages with client sign-off at each point

Inventory Side

- Piece inventory — filter by metal, stone, price range, or availability instantly
- Certificate store — GIA/IGI certs and valuations attached to each piece and sale
- Consignment tracking — owned vs. consignment clearly distinguished
- Provenance docs — documentation linked to each item and client record

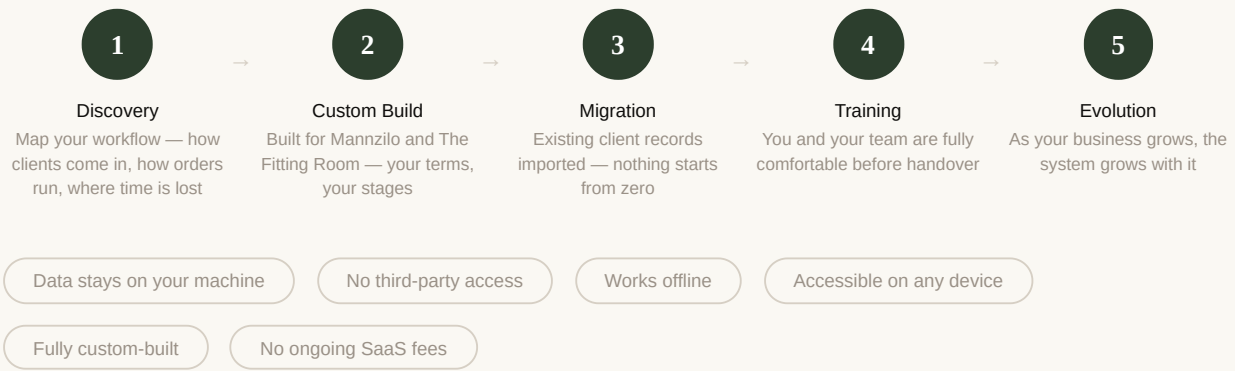

“

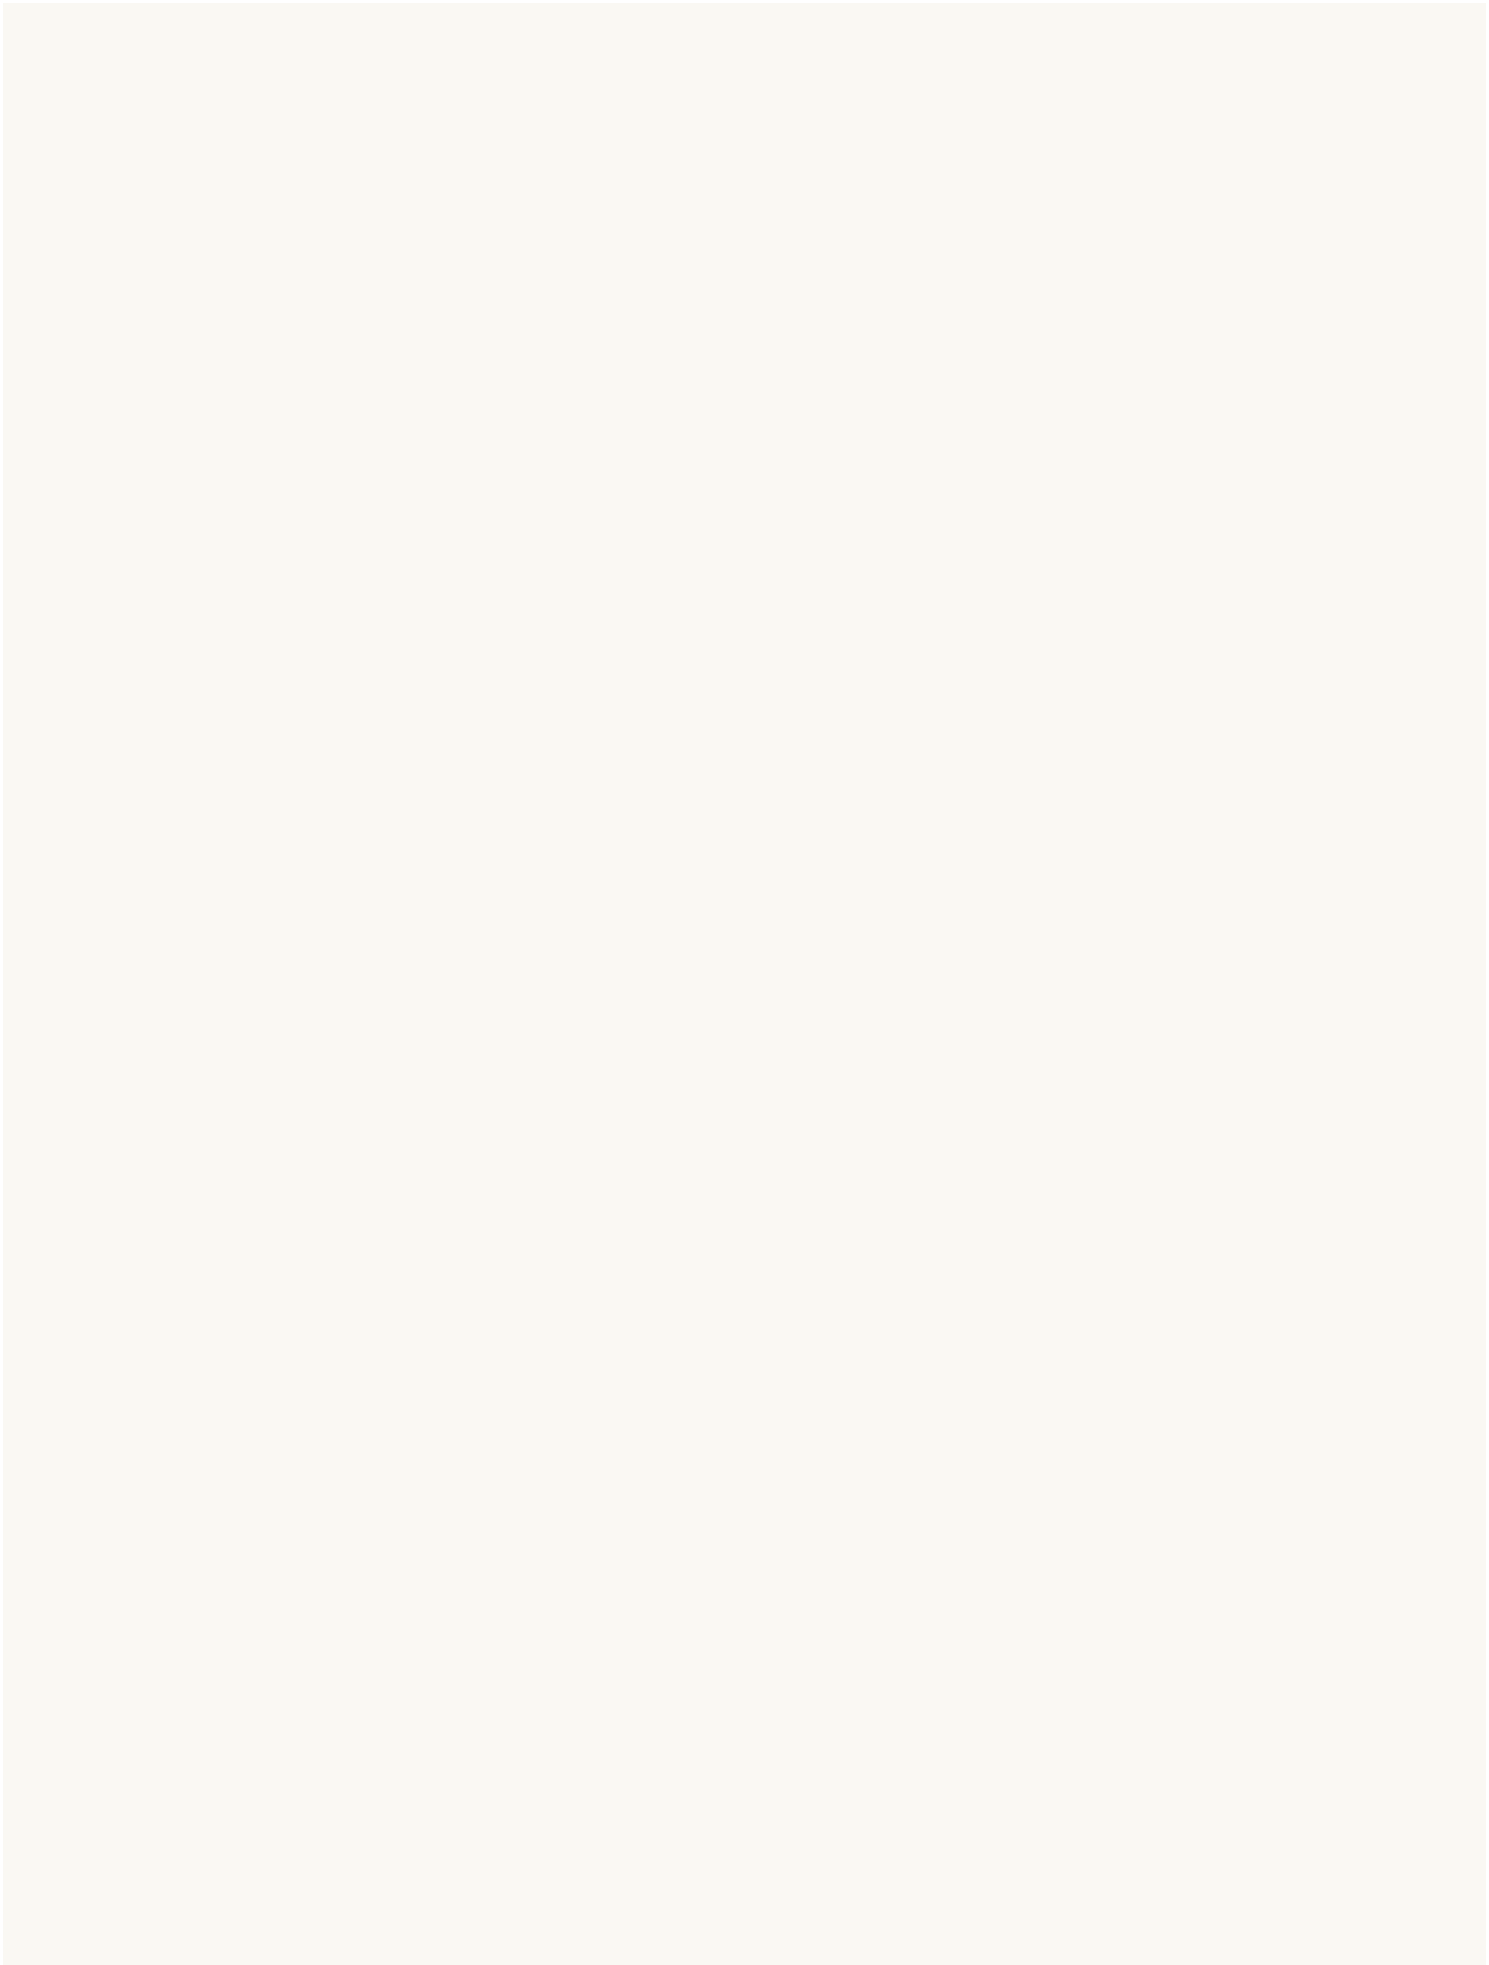

One client. Both businesses. One complete profile — suits and jewellery connected.

Simple to run. *Private* by design.

The system runs on your own machine or private server. Your client data never touches a public cloud. No subscription to a platform that owns your clients. No third party with access to your business.

The next step is *a conversation.*

You've built Mannzilo and The Fitting Room on the belief that details matter. This system is built on the same belief — every feature was designed around a business like yours.

A 30-minute session is all it takes to map out what a system built around you would look like. No commitment — just clarity.

PREPARED BY

Diego Palhano

What to expect from our first meeting

- A walk through your current workflow
- Identification of your biggest time costs
- A clear picture of what a custom system would look like
- No sales pressure, no commitment required
